

RA-215

Comprehensive Lightning Risk Analysis

RA-215 is our exclusive lightning risk analysis service designed to provide you with comprehensive insights into the risks associated with potential lightning damages to your structure and human life.

With *RA-215*, we have devised a comprehensive approach that takes into consideration all variables. By utilizing our advanced methodology, we can accurately assess and calculate the associated risks related to both Economic Loss and Loss of Human Life. Our goal is to provide you with a precise evaluation that enables informed decision-making and facilitates effective risk management strategies.

Economic Loss, this term encapsulates the adverse outcomes stemming from the loss or damage of structures, equipment, valuable assets, and the subsequent production downtime that incurs substantial costs. It is vital to recognize the comprehensive impact of these losses, not only in terms of financial repercussions but also the potential disruption to operations and overall productivity.

Loss of human life, as the term suggests, signifies the tragic outcome resulting from the impact of a lightning strike. Beyond the loss of life, it is essential to acknowledge the accompanying damages that can occur due to this natural phenomenon. These damages encompass a broad range of potential physical and psychological harm that individuals may sustain.

In conclusion with *RA-215* you will receive a comprehensive certified report stating the extent of your risk and the level of lightning protection that is required to mitigate your risk.
